Product information

The waste container can be easily removed and emptied.

Schmale optische, magnetische und elektronische Datenträger können bequem und zeitsparend über eine Eingabeöffnung direkt vernichtet werden.

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch which, when activated, will do just this.

HSM®

Continuous energy-saving operation

This powerful machine provides an excellent cutting performance combined with reliable continuous operation

Low power consumption

The stand-by feature ensures a high degree of energy saving when the digital data media shredder is not in use.

Material anti-jam function

The automatic reverse function rectifies material jams and ensures smooth shredding operations.

High level of user safety

User safety is paramount. A slight pressure on the safety element immediately stops the material feed and prevents unintentional entry into the machine.

Automatic start/stop

An integrated light barrier automatically starts the device when paper is introduced into the feed and automatically stops it after shredding is complete.

Mobile on castors

For convenience, there are castors on the digital data media shredder so it is easy to move around.
