

# HSM Powerline SP 4040 V - 5.8 x 50 mm

## HSM Powerline SP 4040 V shredder baler combination

This compact combination of the FA 400.2 heavy duty document shredder and a vertical baling press is designed for the professional destruction of large quantities of documents, which are then compressed into bales of up to 35 kg.

### Technical data

### Product information

The material feeding is convenient and takes place via the non-slip conveyor belt.

The removal trolley allows for the easy removal and disposal of the compact bales.

To ensure a consistently high cutting capacity, shredder baler combinations with cross cut have a manual oiler.

# HSM®

### Specially hardened solid steel cutting rollers

The induction-hardened solid steel cutting rollers are wear-resistant and guarantee durability.

### Continuous operation

Powerful drive allows continuous operation.

### Compression into boxes or waste bag

The shredded material which has been compressed into compact bales can be cleanly disposed of either in a box (HSM SP 4040 V) or a waste bag (HSM SP 4040 V, HSM SP 5080). These prevent particles from falling out and ensure clean handling.

### Bale weight can be manually set

The bale weight is variable and depends on your requirement (HSM SP 5080, HSM SP 5088).

### User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch.

### Dust extractor

The powerful and energy efficient dust extractor HSM DE 4-100 in dust classification M ensures an optimal extraction due to the high air flow volume, thereby reducing dust emissions (accessory).
